heiko.pl/en

The background of the entire page is a photograph of a vast mountain range. The foreground shows dark, silhouetted evergreen trees on a hillside. Beyond them, a series of rolling hills and ridges stretch into the distance. The sky is a soft, hazy orange and yellow, suggesting the time is either dawn or dusk. The overall mood is serene and natural.

HEIKO

**Heiko offers air
conditioning systems
and heat pumps**

BRAND

Heiko is a brand that was created in response to the needs of the growing market. Its dynamic enables the introduction of cutting-edge technologies. Heiko systems are friendly solutions for the Users, the Installers and the environment. Our brand is distinguished by a wide range of appliances for homes, offices and business.

COMFORT

Heiko prioritises User comfort. The appliances are characterised by: quiet operation, high energy efficiency, intelligent Wi-Fi control and easy and quick installation. Split and Multi Split air conditioners ensure efficient operation in independent modes: cooling, heating, drying, fan and AUTO. THERMAL and THERMAL Plus heat pumps feature energy-saving and quiet operation in a wide range of temperatures.

EFFICIENCY

Air conditioning systems and heat pumps operate based on the eco-friendly R32 refrigerant, which is characterised by reduced global warming potential. In addition, Heiko is distinguished by the inverter technology that significantly reduces the electricity consumption.

SPLIT

Split air conditioners are a perfect solution for homes, offices and business. Heiko appliances provide not only cooling and heating. Their functions exceed standard air conditioner features.

A Split unit consists of two basic components — the indoor unit and the outdoor unit. Our product range includes systems with different capacities to suit the room area size. Heiko is timeless design that fits any interior design. Heiko offers advanced appliances with high energy efficiency, equipped with top quality components.

C1 wall-mounted air conditioners

C1 wall-mounted air conditioners are recognised appliances that operate on the R32 refrigerant. They are available with several capacities, while maintaining high energy efficiency. Moreover, the system operates based on the inverter technology that contributes to lower energy consumption. The slim and simple design of C1 air conditioners makes them a perfect choice for homes, offices and business.

TEMPERATURE SETPOINT from 16 to 30°C

High energy efficiency

Innovative solutions enabled a significant reduction of energy consumption in both cooling and heating mode. The appliances have A++/A+ energy rating.

Quick and easy installation

The design of the air conditioners and new technological solutions enable trouble-free and efficient installation. Easier access, increased installation space and right- and left-sided connection options reduce the installation time to as little as 40 min.

R32 refrigerant

The R32 refrigerant used in Split air conditioners makes them far more efficient than the appliances operating on the commonly used R410A refrigerant.

SMART airflow

An innovative solution for airflow control. The stream is directed upwards during the cooling and downwards during the heating, which enables an even distribution of air, thus preventing direct airflow on the user.

Quiet operation

The components comprising the air conditioner and the optimum airflow system ensure quiet operation for comfort during work and leisure.

BRISA wall-mounted air conditioners

BRISA wall-mounted air conditioners are advanced appliances with high energy efficiency, equipped with top quality compressors. The sophisticated style of BRISA air conditioners makes them a perfect choice for homes and offices. The temperature control and the use of air conditioner functionalities are facilitated by the Wi-Fi control in standard and the included wireless controller.

TEMPERATURE SETPOINT from 16 to 30°C

Wi-Fi control

The Wi-Fi control in standard enables controlling the air conditioner with your smartphone connected to the Internet from any place. The comfortable and intuitive Wi-Fi INTELLIGENT AIR app enables access to all basic settings of the air conditioner.

High energy efficiency

Innovative solutions enabled a significant reduction of energy consumption in both cooling and heating mode. The appliances have A++/A+ energy rating.

SMART airflow

An innovative solution for airflow control. The stream is directed upwards during the cooling and downwards during the heating, which enables an even distribution of air, thus preventing direct airflow on the user.

Airflow speed control

The option to control airflow shutters vertically and horizontally enables precise direction of the airflow. The up-down control function is available from the wireless controller and the Wi-Fi Intelligent Air app. The left-right control is done manually.

Quiet operation

The components comprising the air conditioner and the optimum airflow system ensure quiet operation for comfort during work and leisure.

ARIA wall-mounted air conditioners

ARIA wall-mounted air conditioners are a perfect solution for allergy sufferers! Appliances are equipped with air ionisers that always generate negative ions during the cooling or heating. Negative ions are generated by the ioniser neutralise the charge of positive ions by causing the contaminants to fall on the floor, while reducing the risk of allergy and various infections. The ioniser also helps neutralising the odours in the room.

TEMPERATURE SETPOINT from 16 to 30°C

Ioniser

The ioniser improves air quality in the room. Electrical equipment generates positive ions, also referred to as electrosmog, that attract dust and viruses. Negative ions are generated by the ioniser neutralise the charge of positive ions by causing the contaminants to fall on the floor, while reducing the risk of allergy and various infections. The ioniser also helps neutralising the odours in the room.

Wi-Fi control

The Wi-Fi control in standard enables controlling the air conditioner with your smartphone connected to the Internet from any place. The comfortable and intuitive Wi-Fi INTELLIGENT AIR app enables access to all basic settings of the air conditioner.

High energy efficiency

Innovative solutions enabled a significant reduction of energy consumption in both cooling and heating mode. The appliances have A+++/A++ energy rating.

SMART airflow

An innovative solution for airflow control. The stream is directed upwards during the cooling and downwards during the heating, which enables an even distribution of air, thus preventing direct airflow on the user.

Cassette air conditioners with peripheral airflow

Heiko cassette air conditioners are a great solution for installation at homes, offices or restaurants. The product range includes appliances with different capacity to suit the size of building area. Cassette air conditioners are available with a panel for peripheral airflow. Heiko appliances are discrete, installer-friendly and perfectly match any interior design.

TEMPERATURE SETPOINT from 16 to 30°C

Peripheral airflow

With the 360-degree cover, the air is supplied from four sides and corners to ensure efficient airflow in the room.

High energy efficiency

Innovative solutions enabled a significant reduction of energy consumption in both cooling and heating mode. The appliances have A++/A energy rating.

SMART airflow

An innovative solution for airflow control. The stream is directed upwards during the cooling and downwards during the heating, which enables an even distribution of air, thus preventing direct airflow on the user.

Airflow speed control

The option to control airflow shutters vertically enables precise direction of the airflow. The function is available from the controller.

Quiet operation

The components comprising the air conditioner and the optimum airflow system ensure quiet operation for comfort during work and leisure.

Mobile air conditioners

Compact appliances in sophisticated style, with 4 operating modes: cooling, heating, drying and air supply. The air conditioners are equipped with wheels and carrying handles for easy handling. The appliances are controlled with a advanced panel or a wireless controller.

Wireless controller included.

Full control

Filter cleaning notification (icon on the display) after 250 operating hours.

4 operating modes

Comprehensive application of the appliance for cooling, air supply, drying or heating.

Swing function

Shutter swinging for air distribution as needed.

Timer

The air conditioner has the function to set the operation time. The operation of the appliance will start or end at the programmed time.

Wireless controller (included)

MULTI SPLIT Air Conditioning Systems

This systems enables connection of two up to five indoor units to one outdoor unit. The Heiko Multi Split solution allows the user to control individual air conditioners that form the system and, as a result, set different temperatures on each device.

The system supports heating or cooling at least two different rooms simultaneously. The Heiko Multi Split systems consists of a high-performance outdoor unit and 2 to 5 indoor units in different combinations.

MULTI SPLIT

Outdoor units

R32 refrigerant

The R32 refrigerant used in air conditioners makes them far more efficient than the appliances operating on the commonly used R410A refrigerant.

Inverter technology

The inverter technology enables economical operation of the system without sudden spikes in compressor frequency, while ensuring energy-efficient and quiet operation of the appliance.

Automatic defrosting

Efficient operation of the MULTI SPLIT system in the heating mode, under difficult weather conditions, is possible with automatic defrosting of the heat exchanger of the outdoor unit.

DC motor

The high-efficiency DC motor with a compact design ensures energy-efficient operation of the fan of the outdoor unit. The DC motor, compared to conventional AC motors, ensures lower operation noise of the outdoor unit.

Hydrophilic aluminium film

The special coating of heat exchangers prevents corrosion and extends the service life of the appliance.

ARIA wall-mounted air conditioners

TEMPERATURE SETPOINT from 16 to 30°C

Ioniser

The ioniser improves air quality in the room. Electrical equipment generates positive ions, also referred to as electrosmog, that attract dust and viruses. Negative ions are generated by the ioniser neutralise the charge of positive ions by causing the contaminants to fall on the floor, while reducing the risk of allergy and various infections. The ioniser also helps neutralising the odours in the room.

Wi-Fi control

The Wi-Fi control in standard enables controlling the air conditioner with your smartphone connected to the Internet from any place. The comfortable and intuitive Wi-Fi INTELLIGENT AIR app enables access to all basic settings of the air conditioner.

MULTI SPLIT

Cassette air conditioners

with peripheral airflow

TEMPERATURE SETPOINT from 16 to 30°C

Peripheral airflow

With the 360-degree cover, the air is supplied from four sides and corners to ensure efficient airflow in the room.

High energy efficiency

Innovative solutions enabled a significant reduction of energy consumption in both cooling and heating mode. The appliances have A++/A energy rating.

SMART airflow

An innovative solution for airflow control. The stream is directed upwards during the cooling and downwards during the heating, which enables an even distribution of air, thus preventing direct airflow on the user.

Airflow speed control

The option to control airflow shutters vertically enables precise direction of the airflow. The function is available from the controller.

Quiet operation

The components comprising the air conditioner and the optimum airflow system ensure quiet operation for comfort during work and leisure.

HEAT PUMPS

Heiko's THERMAL and THERMAL Plus heat pumps are modern and energy-saving devices, which ensure efficient and safe operation. They can be used to heat residential houses as well as commercial buildings. The heat pump draws energy from the air and uses it to heat or cool the building and to heat utility water. This eco-friendly solution uses an efficient and environmentally safe refrigerant R32 with reduced global warming potential. The hydraulic monoblock module installed in the devices does not require buying additional components for the heat pump and ensures easy and safe hydraulic connections.

Heiko POOL heat pumps are devices designed for heating or cooling swimming pools. They can be used not only in home pools, but also in places where precise control of water temperature is required.

THERMAL Plus CH + DHW

Monoblock with hydraulic module and integrated DHW storage tank

THERMAL Plus monoblock heat pumps are energy efficient devices which draw energy from the air and use it to heat or cool the building and prepare heat utility water. They can be used in single-family houses as well as commercial buildings. Heiko's heat pumps are advanced devices, which guarantee efficient and safe operation.

Hydraulic module – MONOBLOCK ALL IN ONE

The compact design of the hydraulic module with the integrated 250-litre DHW storage tank is ready to use out of the box. No additional system components need to be purchased, and no extra installation space is required for the DHW tank. The module enables easy and safe hydraulic connections.

MODULE**
MONOBLOK
ALL IN ONE

Two heating circuits

A THERMAL Plus heat pump can be configured to supply different heat loads at the same time, like a radiator space heating system and an underfloor heating system. The two heating circuits ensure separate management of the temperature in different heat loads; in practical terms, different temperature settings can be made for the radiators and the underfloor heating.

Wide temperature range – reliable operation in all conditions

The Heiko heat pumps are reliable units which operate from -25°C outdoors and can heat DHW to 55°C.

**OPERATING
RANGE**
COOLING
0-50°C

Wi-Fi control

The Wi-Fi control is available in standard, which makes operating the Heiko heat pumps more comfortable. The device can be easily controlled with a dedicated app. Thanks to the Wi-Fi control, Heiko service centre can remotely help the user.

Modern control panel

The integrated control panel enables easy and quick changing of operating parameters. The controller menu is available in several language versions.

Quiet operation

The Heiko THERMAL Plus heat pumps have DC motor fans, a well sound-insulated refrigerant compressor, and an optimised air fan design to ensure very quiet operation already at 52 dB(A). The units can also run in a quiet mode for improved comfort at work or while resting.

Automatic weather control

The Heiko THERMAL Plus heat pumps operate in an automatic process controlled by weather temperature curves. In practice, this means that the heat pump operation is adapted automatically to actual weather conditions without any human intervention.

Frequency converter technology

The frequency converter technology ensures economical operation of the heat pump without sudden voltage spikes in the compressor frequency. As a result, the pump's operation is energy efficient and quiet. The appliances have A+++ energy rating.

HEAT PUMPS

POOL

Swimming pool pump

The Heiko POOL heat pumps are devices that can be connected directly to the process circuit of swimming pool water. They are installed near a swimming pool and they can both heat or cool the water. The heat pumps have a condenser, which is resistant to chlorinated or salt water. They are equipped with a panel for quick and easy control. The Heiko POOL heat pumps are a perfect solution not only for home pools, but also wherever precise control of water temperature is necessary.

R32 refrigerant

The R32 refrigerant used in the heat pumps makes them far more efficient than the appliances operating on the commonly used R410A refrigerant.

CONDENSER

RESISTANT
AGAINST CHLO-
RINATED AND
SALT WATER

Smart controller

The integral smart controller enables quick and easy operation through the panel placed directly on the heat pump.

DIRECT
CONNECTION TO
WATER PROCESSING
CIRCUIT

Low power consumption

Innovative solutions enabled a significant reduction of energy consumption.

Heat pump can be controlled by the app

The pool heat pump can be controlled using the SmartLife application, which is available on Android and iOS. This facilitates the operation of the device, thanks to which the User can set any temperature and plan the operation of the device.
